

Lower Total Installed Cost

Viconics has created a complete product line focused on lowering total installation; commissioning and engineering costs associated with controls only retrofit projects.

The latest VT7000 series product line allows you to create new opportunities and a healthier bottom line by reducing your overall project costs. We have eliminated the need to run communication wiring while reducing the components and commissioning time required when installing your next project.

For a live demo of our new and upcoming Wireless, Zoning, Hospitality and Fancoil products please, visit us at booth #1025 at the upcoming AHR Expo or visit us at www.viconics.com
